PRE-PURCHASE INSPECTION CHECKLIST

Ineos Grenadier Station Wagon

2022–present (US: 2024–present) · B58 petrol · B57 diesel (non-US) · 2,922 mm WB

BOXYTRUCKS

CHECK BEFORE YOU BUY

- [ ] **Run the VIN for all three US recalls**
  23V828 (auxiliary switch relay wire trapped under a fastener, fire risk), 23V903 (non-locking nuts on the steering rod ball joint) and 25V147 (door button assemblies short on grease; 7,022 trucks built July 6, 2023 to April 19, 2024). All are free dealer fixes. Ask for proof they were done.
- [ ] **Ask about software and module history**
  Forum owners report fuel 'implausibility' warnings that took more than one reflash, false steering warnings, failed modules and unexplained messages. A truck with documented updates and a quiet dash is worth more than one with a thin service file.
- [ ] **Drive it on a real road**
  Pre-2026 trucks use the slow Bosch recirculating-ball box that reviewers called vague and wandering. Some owners love it, some fit aftermarket stabilizers or pump kits. MY2026 got a new variable-ratio steering gear. Know which one you're buying.
- [ ] **Check for water in the doors and cabin**
  Owners have reported rear doors holding water after a wash, condensation, door seals coming off and a kickplate whose adhesive let go. Look at door bottoms, carpets and seals.
- [ ] **Check the oil level and the break-in service**
  One owner got a low-oil message at 12,000 miles. Many owners did an early break-in oil change (500–1,000 miles was the dealer advice quoted on the forum). Ask whether it was done and check the dipstick reading in the menu.
- [ ] **Confirm the Rough Pack if you want lockers**
  The centre diff lock is standard, but front and rear lockers come with the Rough Pack ($2,850 on base and Fieldmaster at launch; standard on Trialmaster). Look for the locker switches in the overhead panel.
- [ ] **Inspect any lift and big-tire install**
  Agile Offroad warns that lift height changes can damage the factory driveshaft. On trucks with 285/75s or bigger, check that the spare clears the small rear door, and look for tire rub caused by a body sitting off-center on the frame.
- [ ] **Understand the parts and dealer network**
  Ineos is a young brand with a small dealer network, and the factory stopped from September 2024 to January 2025 over a parts shortage. Powertrain parts are BMW and ZF, but body and chassis parts come through Ineos. Ask the local dealer about parts lead times.

YEARS TO KNOW

MY2024	RECALL	Early US trucks covered by recalls 23V903, 23V828 and 25V147; check they're closed
MY2026	SWEET SPOT	Variable-ratio steering box with more assist, revised HVAC, quieter driver assists, Black Edition

RECALLS TO ASK ABOUT

- ☐ **Steering rod ball-joint nuts may not lock**
  2023–2024 · NHTSA 23V903000
- ☐ **Auxiliary switch relay wire can short (fire risk)**
  2024 · NHTSA 23V828000
- ☐ **Door may not latch fully**
  2024 · NHTSA 25V147000

IS IT THE REAL THING?

- ☐ **Lockers (Rough Pack)**
  The centre diff lock (lever) is standard. Front and rear lockers come with the Rough Pack, standard on the Trialmaster and a $2,850 option on base and Fieldmaster at US launch. Look for the locker switches in the overhead panel.
- ☐ **Trialmaster or Fieldmaster**
  Trialmaster adds the Rough Pack (lockers, BFG KO2s), raised air intake, auxiliary battery and switch panel. Fieldmaster brings Safari windows, leather and heated front seats.
- ☐ **Steering generation**
  Pre-2026 trucks have a Bosch hydraulic recirculating-ball box with almost four turns lock to lock. MY2026 trucks get a variable-ratio worm-gear box with more assist.
- ☐ **Engine and market**
  US trucks all have the BMW B58 3.0 petrol six (282 hp). The B57 diesel and the two- or five-seat Utility Wagon commercial were sold in other markets.
- ☐ **Recall status**
  Run the VIN at NHTSA. MY2024 US trucks can carry all three campaigns.
