PRE-PURCHASE INSPECTION CHECKLIST

Toyota Mega Cruiser

1995–2001 · BXD10 · BXD20V · 15B-FT 4.1 I4 TD

BOXYTRUCKS

CHECK BEFORE YOU BUY

- [ ] **Civilian or military?**
  A BXD20V civilian wagon and an ex-JGSDF BXD10 soft-top are different trucks with different values. Ex-military trucks have arrived via third countries (one BaT truck was repainted in Dubai and titled as a 1990), so check the import paperwork and the chassis plate.
- [ ] **Do the 4WS and tire deflation work?**
  Several BaT trucks were sold with inoperative four-wheel steering or central tire inflation, or with parts such as the deflator hose missing. Check them, because these systems are part of what you're paying for.
- [ ] **Underbody rust**
  BaT sellers have noted rust on the underside, painted-over underbodies and rust repair before a repaint. Get under it with a light and a probe, especially around the hub-reduction housings and frame.
- [ ] **24-volt electrics**
  The truck runs a 24-volt electrical system. Budget for batteries in pairs, and make sure any added accessories are wired for 24 V.
- [ ] **Parts supply**
  Ibaraki Prefecture sold its Mega Cruiser partly because parts were hard to get. The 15B engine family was also used in Dyna light trucks, which helps with engine service items, but body and driveline parts are specialist. Find your source before you buy.
- [ ] **Size and access**
  It's 2,170 mm wide, 5,090 mm long and 2,075 mm tall, so measure your garage, check parking and trail widths, and remember the high sills that need the grab handles.
- [ ] **Service records and import papers**
  Recent BaT trucks with records listed axle-shaft, wheel-bearing, motor-mount, gasket and differential-fluid work. Receipts like these, plus clean import documents and a title, add real value.

IS IT THE REAL THING?

- [ ] **Model codes**
  BXD20V (full type KC-BXD20V-RRPEW) is the civilian five-door wagon. BXD10 is the 15B-engined JGSDF High Mobility Vehicle. XCD10 is the later HMV with a Hino N04C engine, built from FY2004.

- [ ] **Civilian vs military**
  Civilian trucks have a hard roof, six seats, air conditioning, a right-hinged side-opening tailgate with a retractable step, and a chain hoist for the high-mounted spare. Military BXD10s typically have canvas tops, inward-facing rear benches, a folding windscreen and run-flat inserts in the tires.
- [ ] **High roof**
  Some civilian trucks had a high roof that wasn't in the catalogue. BaT's 2025 high-roof truck had a fiberglass roof with hatches and safari windows.
- [ ] **Engine**
  15B-FT (mechanical injection) on 1996 to April 1999 civilian trucks, and 15B-FTE (electronic injection) from May 1999.
- [ ] **Drive side**
  Toyota built the Mega Cruiser in right-hand drive. Carscoops put the left-hand-drive count at around twelve in 2020, and one BaT seller claimed seven.
