PRE-PURCHASE INSPECTION CHECKLIST

Lexus GX 550

2024–present · J250 · GA-F · V35A-FTS

BOXYTRUCKS

CHECK BEFORE YOU BUY

- ☐ **Run the VIN for 25V-767**
  2024 GX 550s built May 31, 2023 to April 10, 2024 may be in the engine debris recall (Lexus campaign 25LA07). Check lexus.com/recall or nhtsa.gov/recalls, and get the dealer paperwork showing what was done.
- ☐ **Listen to a cold start**
  The recall's listed symptoms are knocking, rough running, a no-start and a loss of power. Any knock from a V35A is a stop-and-ask-questions noise, not a negotiating point.
- ☐ **Overtrail or not?**
  If you want the rear locker, E-KDSS and 33s from the factory, it has to be an Overtrail or Overtrail+. Other grades have the locking center diff but no axle locker.
- ☐ **Seats vs. capability**
  Seven seats are listed only on the Premium and Luxury grades. Families that need a third row are buying a different GX from the overlanders.
- ☐ **Tire upgrades**
  Trucks already on bigger tires may have a top-shock spacer or adjusted control arms. Ask what was done to clear them, and check for rub marks on the liners at full lock.
- ☐ **Aftermarket wiring**
  Lights, compressors and dual batteries are popular early mods. Look for tidy fusing and switch panels, not taps into factory harnesses.

YEARS TO KNOW

2024	RECALL	3,717 early US trucks (built May 2023 – April 2024) are in engine recall 25V-767. Check the VIN.

RECALLS TO ASK ABOUT

- ☐ **V35A engine main-bearing debris**
  2024 · NHTSA 25V-767
- ☐ **Panoramic View Monitor camera freeze**
  2024–2025 · NHTSA 25V-744
- ☐ **Instrument cluster warnings may not display**
  2024 · NHTSA 26V-341
- ☐ **Load-capacity modification label**
  2024–2025 · NHTSA 26V-179

IS IT THE REAL THING?

- ☐ **VIN**
  US trucks start JTJ. NHTSA's vPIC decoder reads them as the 252 Series with the V35A-FTS engine, built at Tahara, Japan. The 10th character is the model year (R = 2024, S = 2025, T = 2026).

- [ ] **Overtrail vs road grades**
  Overtrail and Overtrail+ have the electronically locking rear differential, E-KDSS, 33-in A/T tires on 18s and a body 4.52 in wider than the GX 460. Seven seats are listed only on the non-Overtrail grades.
- [ ] **2025+ Overtrail lift**
  From 2025 the Overtrail sits 1 in higher from the factory, which matters if you're comparing a used 2024 against a later truck.
- [ ] **Engine recall status**
  2024 trucks built between May 31, 2023 and April 10, 2024 fall under 25V-767 (Lexus 25LA07). Ask for dealer paperwork showing the inspection or engine replacement.
